REPORT

OF THE

TRUSTEES OF THE NEW BOSTON CEMETERY.

For the year ending February 20, 1892.

Although required to yearly make a report to the town and bring to your notice whatever is needful for your sanction and co-operation, we know these reports are valuable mainly for the superintendent's report to us, herewith submitted. As you peruse this report you cannot fail to notice, that in the increase of mortality generally noticeable throughout the country, our beloved town has been exempted, and in point of numbers only the usual death rate is apparent. You will also notice the increase in the number of those who once spent some part of their life here, and who have, in their decease, been brought to the cemetery of their fathers and friends, and as it ever has been, and ever will be, the record shows the removal of active, earnest, loving ones, whose loss is a public and private calamity. In its outward appearance the cemetery shows new and costly monuments, and the care on private lots by surviving friends, equal to past years. We commend also the work of the Improvement society of the town in the labor and interest bestowed.

The work of 1892 is now before us and may its record of interest in "everything decent and in order" be an increase, rather than decrease. As trustees we see that a new survey and laying out of now unavailable portions of the cemetery, and making such portions attractive and

useful for lots must be done, and some further improvements in the roads therein be made. Without further remark we submit the reports.

REPORT

OF THE

SCHOOL BOARD OF THE SCHOOL DISTRICT OF NEW BOSTON,

FOR THE YEAR ENDING MARCH 1, 1892.

During the past year we have supported schools in Nos. 2, 4, 5, 6, 8, 9, 11, 12, 13, 15, and 16, — one term in No. 2, two terms in No. 16, and three terms in all the others.

We have paid tuition in the schools of Weare for three times the usual number of scholars, and have received more than the ordinary amount of tuition from Francestown.

We congratulate the district on the three new school-houses built during the year in Nos. 2, 15, and 16. They are in all respects well suited to the needs of modern schools. They were much needed, and will greatly aid the work of our schools in these sections.

No change of text-books has been made, except the introduction of physical geography and civil government to a limited extent.

We believe our schools, during the past year, have been up to the usual standard, but our standard should be raised. It has been the aim of the school board to hire the best teachers possible and to retain them through the year. But as the money at our command will not allow us to pay teachers as much as they receive in

most of the surrounding towns, it is very difficult to retain the best teachers in our schools. Either the amount of money raised by the district should be increased, or, by concentrating as far as practicable, we should support fewer schools. With the increased salaries thus made possible, our best teachers could be retained in our own schools, and superior ones brought in from outside.

We urge parents and citizens to visit our schools, make themselves familiar with their work, and give teachers a hearty support in all matters of discipline. Without good discipline good schools are impossible.

We believe the high school has been a real benefit to the town, and hope it may become the general custom for the more advanced scholars from all parts of the town to attend this school.

REPORT

OF THE

TRUSTEES OF THE NEW BOSTON CEMETERY.

For the year ending February 20, 1893.

In submitting the report of the Superintendent of the Cemetery herewith subjoined, we cannot fail to notice the unusual exemption from mortality during the year, for which we are profoundly grateful. We also notice that more than half of the interments have been of those who had attained the three score years and ten, or older, and several of the remainder attained the three score years. It brings to mind very forcibly the rapidity with which the old citizens who have made our homes, participated in the burdens, cares, and pleasures of the town are giving place to the young, who in their place will assume and discharge the duties of the home, the schools, and all that pertains to the welfare of the town. As you carefully peruse this report, and the familiar forms appear in memory's mirror, let your hearts throb in sympathy with the afflicted, and let the common mortality to which we are all subject draw us into more helpful relation to each, and especially to the younger and rising generation.

We are pleased to report decided and permanent improvement on the cemetery grounds last season. Surface stones were removed and laid in a substantial wall, or put in a ditch dug for the purpose, to be covered

up in grading; grading, and clearing of bushes opposite the highway above the hearse house, and making the upper part of the cemetery along that highway available and attractive, and nearly all of them sold since that work; the west part of the cemetery grounds was mowed and cleaned up, and late in the fall a survey of that ground was made by George P. Hadley of Goffstown, and a plan of the same; also a survey of the grounds in the northeast part of the cemetery, known as the Dr. Robert Whipple place, and new lots laid out near a proposed water and roadway east of the first survey on these grounds; also repairs on the roadway around the old cemetery, and the work in the cemetery gives us more satisfaction, in reviewing the past year, than have some preceding reports done.

The constant general excellence of the monuments erected should also be mentioned.

We urge, most earnestly, the necessity of the citizens looking each year to the condition of the monuments at the graves of their friends and relatives. Many of the bases of these monuments are so light the monument is blown down or displaced. Surely it is your work of love to care for these things, and not wholly ours; nor do we feel authorized to expend labor or money on such headstones as mark the resting place of those who have left behind them friends and relatives amply able to incur the small expense of suitably replacing and making these monuments secure and sightly. We notice the expediency of placing a stove in the hearse-house, and of conducting water there, that the hearse, in muddy and freezing weather, also the harnesses, may be put in a respectable condition immediately after use, and eventually we hope to accomplish this desired object.

REPORT

OF THE

SCHOOL BOARD OF SCHOOL DISTRICT OF NEW BOSTON,

FOR THE YEAR ENDING MARCH 1, 1893.

During the year we have maintained twelve schools in the town and have paid the town of Weare $92 for tuition. Eleven of these schools have been run 25 weeks each and one 27 weeks to make up for a lack the year before.

The number of pupils has been 215, against 230 the previous year. The cost per scholar for the year has ranged from $6.77 to $33. The average cost has been $10.28; the lowest, $6.77, in school No. 5; the highest, $33, in No. 6.

The matter of text-book revision has received careful consideration. The study of mental arithmetic and a practical course in business forms have been introduced, while a supplementary reader on American citizenship has been given a trial. General supplies, such as pens, pencils, slates, and paper, have been furnished the pupils free at very slight cost to the town. The whole amount paid out by the town for books and supplies has been $244.05.

We do not think it best to speak in detail of all our schools and teachers, but one school deserves special mention, the town high school.

Miss Covell has proved a teacher of rare ability, and the work done under her direction is seldom equalled for

excellence. She is an earnest, enthusiastic worker, and has aroused a like spirit in her pupils. The school has been better graded, its standard raised, and work befitting its name and purpose done. Among the studies pursued have been advanced arithmetic, book-keeping, algebra, geometry, Latin, physiology, English composition and rhetoric, physical geography, and physics.

The school has fully vindicated its right to be, and now should be more generously supported, its year lengthened, and the present high standard of teaching maintained. Money spent here is a wise investment.

Mainly through Miss Covell's efforts a prize-speaking contest, the first in the history of the town, was held last December. Ten pupils of the high school entered the contest. The results were so excellent that all were surprised and the judges not a little puzzled in discharging their duties. Fifteen dollars were awarded in prizes as follows: Two first prizes, $5 each, Albert E. Shedd and S. Russell Atwood; second prize, $3, Myrtle M. Felch; third prize, $2, Fannie B. Prince. This should prove a permanent feature in the future, for there is no branch of education more neglected in our schools than public speaking.

The year has thus shown signs of the good time coming when longer terms, larger schools, and better teachers will give our boys and girls a fair chance to gird themselves for the battle of life. Much, however, remains to be done, and your board would fail in its duty did it not mention a few matters calling for immediate attention. Practical experience, that best of all teachers, has shown us serious hindrances to progress. Foremost among them stands the number of our schools. No lasting improvement can be made until we have fewer schools. We need longer and larger schools and better teachers. Better schools, fewer in number, rather than many of the good, bad, and indifferent kind, is the real need and the first step of advance. A start in this direction should be made at once. Two of your board are convinced that school 11 should be discontinued in its present location; the dissenting member believes that for the good of the schools this schoolhouse should remain where it is for the present.

Our registers speak ill for our zeal in school matters. Absentee and tardy marks are far too numerous and show a woful lack somewhere. Sickness and bad weather are usually the only valid excuses for absence. The mind is more delicate than the body and needs care and regularity in its development. Parents wrong their children when they yield to their whims in this respect and allow them to stay away from school for insufficient and often trivial reasons. By setting a proper value upon educational advantages and insisting upon their children's punctual and regular attendance, parents will do much to improve our schools.

We ask hearty co-operation in another respect. The whims of the child cannot regulate the course of study; schooling is not a go-as-you-please race. Not the likes and dislikes of a child but what wisdom and experience decree must decide these matters. Your board, acting tarough wide-awake teachers, must be the final authority here; the highest good of scholars and schools alike demand this, and parents can help very much if they will.

We need the same liberal financial support. The income from the Christy fund will fail of good if we lessen our own appropriations. Old things are passing away, better things are coming. What has availed for the father will not avail for the children. The world is moving on and its demands increase. We need longer terms in all our schools. We must pay higher salaries if we would secure and keep the best teachers. Our high school needs more money. It pays to be generous here, half-way measures are costliest. The school is a necessity if our boys and girls are to have a fair show in the great progressive world into which they must soon pass.

An aggressive school board, broader views, practical co-operation on the part of parents, and generous financial support, these are pressing needs. We are laying foundations; let them be worthy of the Granite State, and the sons and daughters of New Boston will bear a strong and noble part in the grand work of the twentieth century.
